

## Aidan Koornneef

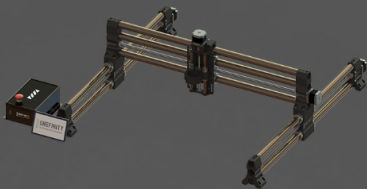

### I'm a problem solver.

I believe almost any problem can be solved given enough time and effort. Usually the best way to solve a problem is through collaboration whether that be through coworkers or google. Have a look around my website here to see the many different problems I have or am currently solving!

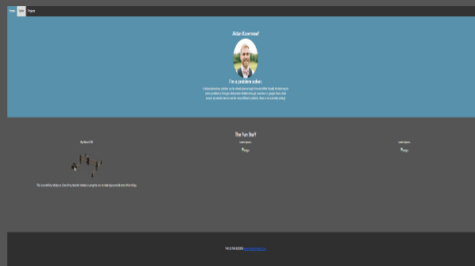

## The Fun Stuff

### My CNC

This is a onefinity hobby cnc. One of my favorite Hobbies is using this cnc to make signs and all sorts of fun things.

### This Website

This website is my first time implementing django, html, and css with bootstrap all into one project. It has a been a lot of fun seeing it come together and gaining a deeper understanding of how the internet works. Making a website look good is hard work.

### The Cafe

My wife and I started school street cafe back in 2020. This is one of my favorite projects that I have worked on. I created the menu and many other furniture pieces in the cafe which makes the place feel like home.
